

## Kohinoor Fund

The Kohinoor Fund is a global macro/volatility hybrid fund which aims to achieve 15-25% returns per annum with commensurate risk over a medium to long term investment period.... [More»»](#)

## Cullinan SPC (previously Excelsior SPC)

Cullinan SPC was developed based on a global macro premise that the current provision of liquidity to financial markets will lead to significant price asset inflation in time. This is a tail risk fund that will make large returns in exceptionally hig... [More»»](#)

## Regent SPC

The Regent SPC has been created to exploit a perceived opportunity in the gold market. It is positioned predominantly in long-dated gold options.... [More»»](#)

## Dresden Green SPC

The Dresden Green SPC has been created to exploit a perceived opportunity in the Japanese Yen currency options market. It is invested in long dated out-the-money options and aims to achieve a 5%-10% return per annum.... [More»»](#)

## About Us

Founded in 2001 by Richard (Jerry) Haworth (former Head of Equity Derivatives at Investec and founder and ex-CEO of Peregrine Holdings Ltd) and Richard Hollington (former Head of Gold & Precious Metal Derivatives at First National Bank and Senior Dealer Gold and Commodity Derivatives at CBA), 36 South provides an intelligent way to invest in volatility. The firm is an established absolute return fund manager which specialises in managing global macro/volatility funds.

The company's flagship offering is the Kohinoor Fund which has been trading for 8 years and is a long volatility fund that is designed to perform well in most market environments but will usually substantially outperform in periods of extreme market movement and volatility.
